However, their main advantage is that they pay a steady stream of interest payments forever.

The advantages of roll-ups are

Broader product range.  
Greater customer choice.  
Economies of scale and reduced costs.  
Specialisation of functions.  
More diversified revenue streams and risk profiles  
Employment stability and/or prestige.  
Branding.  
Political clout.

By planting millions of fruit trees, mandarins (clementines and late mandarins), lemons (unlike other citrus), olives, avocados, etc. are harvested year round.

Citrus trees, olive trees, avocados, etc. I told a farmer 10 years ago to plant avocados.

Sicily is a great environment for trees; 2000 years ago it was covered with forests.
